RECESSED PANELS

DOORS WITH RECESSED PANELS

MADE-TO-MEASURE ELEGANCE

Let your imagination run free by creating your own model of door: Decide on the number of panels to embed as well as their size, add a molding of wood or aluminum to accent the relief, choose the pre-finishing color. And there you have it. You will have a unique door... a steel door which respects the most demanding of performance standards and is resistant to fire... a designer door which will harmoniously integrate into your project.

RECESSED PANELS
